

**FOR IMMEDIATE RELEASE**

## **Kanfit Achieves Nadcap Accreditation for Composites**

(Migdal HaEmek, Israel (June 25, 2019) -- Kanfit Ltd., a leading built-to-spec / print aerospace engineering and manufacturing company, announced today that it has successfully completed a Nadcap recertification audit for Composites, including processes for control testing.

The scope of the Nadcap accreditation extends to Core Processing (CP) for Liquid Resin Processing (LRP) and Prepreg / Adhesive Bonding / Resin Film Infusion and Process control Testing (audit criteria for non-metallic part manufacturers' captive laboratories).

Accreditation for LRP authorizes Kanfit's RTM (Resin Transfer Mold) process according to the requirements of Israel Aerospace Industries.

In addition to Composites, Kanfit is Nadcap accredited for Heat Treatment and mechanical testing for aluminum, as well as for conversion coating processes and testing processes that support chemical processes.

"Kanfit continues to strive to provide its customers with the highest quality solutions for meeting industry standards without compromise," said Kanfit General Manager Shai Fine. "This certification is affirmation that we are committed to providing our customers with the best quality parts and innovative solutions."

Kanfit Ltd. is a manufacturer of primary and detailed parts, sub-assemblies and fit to fly assemblies made from composite and metal materials for the aerospace and medical device industries.
