Kanfit Successfully Completes Two Nadcap Recertifications

Kanfit Achieves Nadcap Merit Status for Chemical Processing

Migdal HaEmek, Israel (October 16, 2018) -- Kanfit Ltd., a leading manufacturer of assemblies and subassemblies for the aerospace industry, announced today that it has recently achieved Nadcap re-certification for chemical processing and heat treatment following thorough audits of the Performance Review Institute.

Kanfit was awarded recertification of Chemical Processing and is qualified for full Nadcap merit status of 24 months. This means that the frequency between audits has been increased from 18 months to two years. Kanfit has been Nadcap accredited for chemical processing since 2013, and has been accredited by Nadcap for heat treating since 2008.

“This has been an intensive period for Kanfit. Earning re-accreditation for these special processes demonstrates Kanfit’s commitment to manufacturing the highest quality products that meet stringent industry demands,” said Kanfit General Manager Shai Fine. “As a as a reliable and trusted airspace provider, we continue to strive to improve and achieve the highest levels of excellence in order to meet our customers’ needs.”

About Kanfit

Kanfit is a leading manufacturer of primary and detailed parts, sub-assemblies and ready to fly assemblies made from composite and metal materials for the aerospace and medical device industries. Kanfit uses a wide range of manufacturing processes to produce composite components, including Autoclave, RTM, LRI, Prepregs – oven & vacuum, and Wet Lay-Up. Kanfit is AS9100D certified and Nadcap accredited for heat treatment and chemical processing.
